Work History

NEWS DIGITAL MEDIA - SENIOR WEB DEVELOPER 06/2011 - PRESENT

I manage a range of websites including sites which attract a large amount of traffic, I deal with lots of caching technologies to ensure that sites can handle millions of hits a month. I have lots of exposure to ESI, Memcached and legacy code. I have also recently been given the role of lead developer for an internal informative dashboard project which we aim to make open source.

Major Job Roles

- Develop new components for existing large scale community websites
- Integrate Akami into existing websites
- Meet with key stake holders and plan agile sprints

Minor Job Roles

- Coordinate releases to a range of servers
- Update existing code to support Master-Slave database servers
- Review and update existing code to meet security standards

HTSG - SENIOR WEB DEVELOPER 09/2010 - *PRESENT*

I am a senior developer for our flagship education product, catering for over 500 clients. This system allows a school to manage all their students, marks, teachers and teaching plans.

Major Job Roles

- Develop core architecture
- Manage and train the junior developers
- Manage our Git repository, this including setting up Gitorious, managing sub repositories as well as user/permission management

Minor Job Roles

- Train staff members on how to use Symfony
- Write code documentation (I wrote all the internal code documentation)
- Conduct code reviews
- Develop and enforce coding standards (This was done with PHPCS)

SOLUTION 4 - MID SENIOR WEB DEVELOPER 06/2010 - 09/2010

I was a Mid Senior Website Developer working on multiple components for the Senro Application which will be the backbone of Aussie Home Loans mortgage broking business.

Major Job Roles

- Develop application components to meet the expectations of Aussie Home Loans
- Brainstorm new components and how they will be turned from a spec to a fully working component

Minor Job Roles

- Participate in meetings with Aussie Home Loans and interpret their needs and develop components to meet requirements

ADAMS MARKETING - WEB DEVELOPER / JUNIOR DESIGNER 09/2009 - 06/2010

I am the Junior Designer and the Lead Web Developer for Adams Marketing.

Major Job Roles

- Design websites from scratch to meet client brief
- Develop websites to match client brief
- Design print campaigns to meet client brief.

Minor Job Roles

- General office tasks
- Office Technical Support.

HOT GRAPHICS - WEB DEVELOPMENT MANAGER 02/2009 - 09/2009

While working at Hot Graphics, I was the the Web Development Manager and was in charge of all client communication that related to the clients website.

Major Job Roles

- Quote clients based on requested website features
- Liase with clients while their website is in the design / development stage
- Develop client websites
- Manage job queue.

Minor Job Roles

- Office Technical Support.
- Answer phone base client queries
- General Office Duties.

JOYER CONSULTING - WEB DEVELOPER 03/2008 - 02/2009

While working at Joyer, I was employeeed as a Trainee Website Developer and completed my Certificate IV in Information Technology - (Websites) (Design) With Distinction

Major Job Roles

- Develop client websites.

Minor Job Roles

- Answer phone calls
- General Office Duties.
