MINT **ERROR** NEWSTM MAGAZINE

Bringing the latest mint error news to the collector.

Mike Byers, Publisher & Editor, Welcomes You!

Welcome to Mint Error News Magazine, bringing the latest mint error news and information to the collector. This is our sixth year bringing you both an online PDF magazine and the Mine Error News website. It is an exciting time for mint errors. We are proud to feature the world's most valuable mint error on the cover of this issue and are thrilled to announce the release of Mike Byers' new mint error book, World's Greatest Mint Errors.

There are now over 750 articles, features, discoveries, news stories with mint error related info from the United States and around the World. Our website, minterrornews.com, has become the most popular and informative Internet resource for mint errors and is read by thousands of dealers and collectors.

Mike Byers (mikebyers.com) has been a Professional Numismatist since 1978. He is the largest dealer of the world's rarest mint errors. He specializes in U.S. and World Major Mint Errors and Die Trials. His new discoveries of major mint errors have been front page news for years. He is a life member of ANA since 1985, a charter member of NGC and a featured dealer/member of PCGS. He is a founder member of the California Coin & Precious Metals Association. He is also a life member of the Central States Numismatic Society and the Florida United Numismatists. He is member A71 in the Certified Coin Exchange (CCE). Mike Byers was a Consultant for ANACS for Mint Errors from 2000 through 2006.

Allan Levy has been specializing in Mint and Currency Errors for 25 years. His website features a diverse group of type errors, modern errors and major currency errors. He also handles regular U.S. and World coins. Allan Levy is a member of CONECA and the American Numismatic Association.

Fred Weinberg & Co.
Dealer in Major Mint Error Coins & Currency
fredweinberg.com

Fred Weinberg is the President of Pacific Rim Numismatics (DBA Fred Weinberg & Co.). He is a highly respected numismatist, with 35 years of full time experience in the rare coin marketplace. His professional associations include the American Numismatic Association (ANA) (38 years), the Professional Numismatist Guild (PNG) (31 years), The Industry Council for Tangible Assets (ICTA) (21 years) and The Numismatic Literary Guild. He is a past President of the Professional Numismatist Guild (1999-2001).

Mint Error News is sponsored by Mike Byers and several other mint error dealers including Allan Levy (alscoins.com) and Fred Weinberg (fredweinberg.com). Additional sponsors are Heritage Auction Galleries, CoinLink, CoinFacts.com, uspatterns.com and errorworldclub.org. We encourage collectors and dealers to submit articles and photos of major mint errors that we may feature on the website.

Off-Center Mint Error Sales

by Al Levy (alscoins.com)

Here are records of recent sales of off-center mint errors on eBay from January 1, 2009 to March 31, 2009.

1. All lots had buyers. If the coins actually changed hands is unknown.
2. A picture accompanied each lot or it was not recognized.
3. Mislabeled items were ignored.
4. Some lots may have changed hands more than once.
5. "D" next to the date symbolizes that the coin had damage or was scratched.
6. "C" next to the date symbolizes that the coin was cleaned.
7. "B" next to the date symbolizes that the coin had damage and was cleaned.
8. If the date or mint mark was missing or partially visible, parentheses were used.
9. Postage/handling/insurance fees were ignored.
10. Major auctions were not listed.

Double Denomination & Off-Metal Mint Error Sales

by Al Levy (alscoins.com)

Here are records of recent sales of double denomination & off-metal mint errors on eBay from January 1, 2009 to March 31, 2009.

1. All lots had buyers. If the coins actually changed hands is unknown.
2. A picture accompanied each lot or it was not recognized.
3. Blurry pictures or other problems are notated under "observation."
4. Items mislabelled commanded a small premium.
5. Some lots changed hands more than once.
6. Any scratches, dents or defects notated were either in the description or grading service's holders.
7. Auction houses that listed these errors were ignored.
8. Shipping charges are not included.

DESCRIPTION	GRADED	SOLD	OBSERVATION
DOUBLE DENOMINATIONS			
1986-P STRUCK CENT ON A STRUCK DIME	NGC 64	\$621.01	2ND STRIKE 45 DEGREE CCW TURN. BOTH DATES + MM REMAINS.

Buffalo Nickel “Speared Bison” & Wisconsin Quarter “Extra Leaves”

by Al Levy (alscoins.com)

Please note: the error types listed below were ebay lots that closed with a high bidder. If the reserve price was not met, or picture was not attached, then I ignored the auction. Fuzzy pictures, or questionable descriptions are not included.

An important observation about the Buffalo 5c “speared bison” & the Wisconsin 25c “extra leaves” are eBay items only. Dealers are stocking and selling these at shows. Prices have taken a major downturn. Demand has diminished greatly for the speared bison. The majority of listed coins remained unsold. Extra leaves have gone down in price as more entered the market.

The high leaf is scarcer than the low leaf. Check out the sales totals as both varieties are about the same in quantities. Still very actively traded.

End of roll coins. Collectors need to know that there is a machine on the market that will allow anyone to roll your own coins. It is a crimping machine to be used with pre-crimped (shotgun shell) style wrappers. Buyer beware!!!

Here are records of recent sales on eBay from January 1, 2009 to March 31, 2009.

Waffled Coin Sales

by Al Levy (alscoins.com)

Waffled coins are the material destined for recycling back to the manufacturer. This also includes condemned coin bins or floor swept material. Waffled errors bring substantially higher prices than any that show no error. Many of these cent through dollar slabbed waffles are showing up at the major shows and easily traded.

The U.S. Government claims these are not coins.

Here are records of recent sales on eBay from January 1, 2009 to March 31, 2009.

U.S. QUARTER EAGLES

FAMOUS 1900 INDIAN CENT STRUCK ON QUARTER EAGLE PLANCHET

See Color Plate 2

- 856 **1900 Indian Cent Struck on a Quarter Eagle Planchet. Mint State 64.** One of America's most spectacular, eye-catching mint errors! This is the famous Beck Collection specimen, sold by our good friends Jerry Cohen and Abner Kreisberg, in January 1975, Lot 609, where it was described: "Gem Uncirculated. Formerly in the collections of the famous St. Louis coin dealer B.G. Johnson and in the Col. Green collection. This is the first time we have ever had an error of this type in our QUALITY SALES. We know there are supposedly three other Cents struck in gold but none have been offered for many years. Valued by the consignor at close to \$10,000.00." The lot realized \$7750.00.

In the 14 exciting years since then, our coin "hobby" has become big business. As a consequence, prices have advanced markedly in virtually every area. We expect a record realization when this one is hammered down.

- 857 **1903. Mint State 65. 1925-D. Mint State 65.** Deep golden lustre on the 1903 and particularly flashy brightness on the 1925-D. A lovely pair to represent both modern types of American Quarter Eagles. Lot of 2 coins.
-

GEM PROOF 1910 QUARTER EAGLE

- 858 **1910. PCGS graded Proof 65.** Struck in the satin or "Roman Gold" finish found on Proofs of this year and 1909. A magnificent, premium quality example with lovely, rich coloring. Even under magnification, it is very difficult to find a single detracting mark. According to Mint records, a total of 682 Proof 1910 Quarter Eagles were struck. It is assumed that this figure is either incorrect or that a great majority of the original mintage was melted in 1910. Today, approximately 50 to 60 pieces are known with most of these grading between Proof 60 and Proof 64. As of March 1989, this is one of only three pieces graded as such by PCGS with none graded higher. An outstanding opportunity for the sophisticated collector.

Presenting The World's Most Valuable Major Mint Error!

From uspatterns.com:

Cents on Quarter Eagle Planchets

The Indian cent struck on a quarter eagle planchet. The year 1900 was listed by Pollock as P1990 because of the possibility that they were deliberately struck for collectors. The only problem with this is that 1900 is not the only date known. The illustrated 1906 piece was offered in Stacks June 2004 sale and Taxay lists 1907 and, also, 3 other years for Lincoln cents in his 1976 Comprehensive Catalog.

With regard to the 1900, 3 or 4 are believed to exist including the circulated 1993 ANA example and the PCGS MS 65 Col Green, Beck, Byers coin, which is illustrated above, and is believed to be the finest known for any of these. The earliest known purchase for one of these was the 1900 in the Dewitt Smith collection that was purchased by Virgil Brand in 1908 and entered into the Brand journals as item #46973.

Just Certified - PCGS Just Certified this Indian Head Cent Struck on a Gold \$2 1/2 Planchet MS 65.

Fred Weinberg also attended the 1975 Cohen-Kreisberg Auction of the Beck Collection and was the under-bidder on this coin. Because he is the mint error consultant and authenticator for PCGS, this coin was sent to him to authenticate. Upon examining this gold Indian Cent, Fred stated that "It's one of the most breathtaking mint errors to see in person, and one of the most famous and rare mint errors of all time. In my 40 year career of dealing in mint errors, it's one of a very few coins that I regret not buying when I had the opportunity. When it was delivered to me to authenticate for PCGS, it brought back the thrill and awe of examining it again, after 35 years. The combination of rarity, condition and pedigree makes this gold Indian Cent a world class mint error."

Today - This spectacular Gold Cent is featured on the cover of Mint Error News Magazine Issue 27.

Presenting The World's Most Valuable Major Mint Error!

In the last few years, several U.S. Major Mint Errors have sold, both in public auction and via private treaty, anywhere from \$200,000 to close to \$400,000. Listed below are several of these including the prices realized.

A 1944 Steel Cent NGC MS 66 sold in a recent Heritage auction for \$373,750.

A 1915 Gold Pan Pac 50¢ NGC PF 64 just sold for \$345,000. in a different Heritage Auction.

A Gem Mint State Copper 1943 Cent sold for almost \$300,000. to a private collector.

A 1916 5¢ Doubled Die Obverse PCGS MS 64 sold for \$264,500. in a Heritage Auction.

A 1918/7-D 5¢ PCGS MS 65 just sold in a Heritage auction for \$253,000.

A 1943-D Copper Cent PCGS MS 64 sold for \$212,750. in a Goldberg Auction.

An 1859 Indian Cent Dual Obverse Mule PCGS MS62 sold for \$195,500. in a Heritage Auction.

Considering that quite a few mint errors are realizing six figures in today's market, it takes an absolutely spectacular mint error to claim the title of "world's most valuable." This rare and world-famous Gold Indian Cent, which was just authenticated and certified by PCGS as a Gem Mint State 65 with an exceptional pedigree, certainly meets the criteria for being the **world's most valuable mint error**. This Gold Cent sold for a world record price in 1975 and would certainly set another record if sold today.

This coin will be displayed at the Long Beach Coin Expos and the 2009 ANA National Money Show in Los Angeles. It is valued at and has been insured for a half-million dollars. Sorry, it is currently not for sale.

World's Greatest Mint Errors Published

World's Greatest **Mint Errors**

*A Guide to the Most Spectacular
Major Mint Error Coins*

Mike Byers

World's Greatest Mint Errors Published

The United States Mint produces billions of coins each year. But, on occasion, a coin escapes the Mint that was never intended for general circulation. These most unusual coins, called mint errors, can fetch tens of thousands of dollars from dealers or collectors in the numismatic market.

For anyone interested in learning more about these uncanny mint-made mistakes, World's Greatest Mint Errors is an enjoyable resource packed full of some of the most dramatic, rare and extraordinary

mint errors and die trials ever assembled in one publication.

Hundreds of spectacular mint errors are pictured. Each error coin photo is presented in full color, and enlarged to enhance the smallest details. Some of the error coins featured in this book have never been seen by the public before, and each is described in great detail as to the type of error, the assigned grade, rarity and estimated value.

Also included at the end of most chapters are extensive price charts. This pricing was compiled by

leading mint error dealers from within the professional numismatic community and will serve the reader well as a useful guide to mint errors and die trial values.

The information found within these pages will bring anyone interested in mint errors up to date with the latest information on new discoveries, new types of errors and a collection of some of the most dramatic, unique and spectacular mint errors and die trials from the United States and around the world.

Mike Byers Interview

In March of 2009, Jessica Mullenfeld of Zyru Press conducted an interview with Mike Byers regarding his new book, World's Greatest Mint Errors. Here it is in its entirety:

Q: Who do you think should read this book?

A: This book is accessible to any coin collector or numismatist that is interested in mint errors, regardless of experience. For the advanced collector, there are price guides of each major mint error type. For the beginning collector there are color photos and descriptions of how each mint error type occurs.

Q: All of the demand for coin books seems to be for pricing guides, how will this appeal to those who just want to make money off of their coins?

A: Price guides are included in this book as well as information and

photos on the finest known and most valuable mint errors. The prices in the price guides at the end of each chapter reflect the retail value of each mint error type. This is valuable information for collectors who are selling mint errors.

Q: What was the driving force for you to put this book together?

A: I have been a mint error dealer for over thirty years and have handled some of the most spectacular and most valuable mint errors in existence. I wanted to share my experience and information with dealers and collectors. I have also received hundreds of e-mails from collectors and readers of my website and magazine asking if I had a book

out, and if so how they could order it. Most were looking for a book with photos, descriptions and price guides for major mint errors, but one did not exist.

Q: Why did you choose mint error coins over all of the other coin collecting types?

A: In my opinion, major mint errors are one of the most fascinating segments of numismatics. They represent mistakes during the minting process and production of coins. Many are unique, rare, dramatic, expensive, famous and are undervalued.

Q: To get to know you more personally, what was the first mint

Mike Byers Interview

error coin that interested you in this business?

A: I was born in the business and am a third generation coin dealer. I started to attend coin shows with my Dad, at the age of four. I'll never forget the day when he brought home a sealed canvas bag of 1962 Lincoln Cents for me to open and search. After several hours and blurry vision I found a Lincoln Cent that was struck 50% off-center. I was immediately hooked.

Q: Was there any part of the book that you enjoyed doing the most?

A: I enjoyed reviewing the photos of many dramatic and spectacular mint errors that I have handled over the past thirty years. I also enjoyed researching and assembling the price guide to assist collectors.

Q: There are also extensive price charts at the end of the chapters. Will these prove to be useful reference tools for collectors?

A: This is the first published book of major mint errors that accurately lists the retail values of most types of mint errors. Values are included for early type coins as well as modern types. This price guide is a guide. Prices fluctuate due to the date, grade, eye appeal and how dramatic the striking error is. Rarity is also a factor. The price is sometimes based

on the rarity and grade of the type of coin as well as how rare the error is.

The price can also vary depending on whether two collectors are bidding for the same rare major mint error. When purchasing a mint error, it is important to use multiple resources to determine value, as there are many mint errors that do not fit into one category.

Q: Some of the error coins featured in this book have never been seen by the public before. Can you give us an example?

A: One example that comes to mind is the unique U.S. Walking Liberty Half struck on a U.S. Steel Cent planchet during World War II. It was authenticated and certified by PCGS as Mint State 64. It is perfectly centered and is breathtaking to see. It is one of the most valuable U.S. mint errors.

Q: What is the key message of what you would like other collectors to take away from this book?

A: I hope to raise interest, awareness and excitement in this fascinating area of numismatics. By sharing valuable information, prices and photos, coin collectors can enjoy and pursue major mint errors as part of their existing collection. New collectors can learn about mint errors and use this book as their

guide.

Q: Once this book has reached the readers, what do you hope to receive as far as feedback goes?

A: My goal is to help educate, inform and excite experienced collectors and new beginners about fascinating mint errors that are discovered and treasured. Based on the feedback I have received so far over the last few years with my website and magazine, this book on mint errors will become a useful reference for collectors.

Q: Did a guy like you, who is so deep in the knowledge of mint error coins, learn anything new from doing this book?

A: After five years of compiling this mint error book and after researching the prices and assembling the photos and descriptions of these major mint errors, I've realized how truly rare and undervalued major mint errors are in comparison to the prices realized for regular types of U.S. coins.

Q: The book sounds like it will be a great addition for collectors. How can folks get a copy?

A: Zyruss Press is the publisher. They will be available to order online at zyrusspress.com and at amazon.com.

About The Author: Mike Byers

A professional numismatist since 1978, Mike Byers is now the largest dealer of the world's finest mint errors, die trials and numismatic rarities. His new discoveries of major mint errors have been front page news for years.

Mr. Byers is a life member of the ANA since 1985, a charter member of NGC and a featured dealer/member of PCGS. He is a founding member of the California Coin & Precious Metals Association and a life member of the Central States Numismatic Society and the Florida United Numismatists. Mike Byers was a consultant for ANACS for mint errors from 2000 through 2006.

When Mike Byers is not at coin conventions buying and selling mint errors he is usually in his office with customers or editing the next issue of his mint error magazine or catalog.

Foreigners in the Mint

A Mint Error News Exclusive Report

by Gregory Mirsky

Editor's Note: Here is an updated version of one of the most popular Mint Error News articles.

The United States Mint struck coins for foreign countries starting in 1833 but did not have official authority to do so until The Mint Act of Jan. 29, 1874 was approved and signed into law. The 1874 act states that the US Mint may mint coins for a foreign country if the minting does not interfere with regular minting operations, and shall prescribe a charge for minting the foreign coins equal to the cost of the minting (including labor, materials, and the use of machinery).

The US Mint did strike Liberia (LR) one cent coins in 1833. The Liberia one cent, in essence a token dated 1833, was struck by the Mint for the American Colonization Society. The US Mint had long been in the business of striking medals for various groups and artists, in fact, the US Mint was the only place to go in North America if you wanted a large sized medal struck since no other equipment was available that could handle the immense pressures required to strike such pieces. The prospect of the mint manufacturing tokens, as in the case of the Liberian cents, was not a far offshoot from the medal making business. Thus it

is believed that the medal manufacturing activities of the mint led to some of the very first foreign coinage struck by the US Mint.

The American Colonization Society was founded in 1817 for the sole purpose of transporting free-born blacks and emancipated slaves back to Africa. In 1822 the society established on the West Coast of Africa a colony that in 1847 became the independent nation of Liberia. By 1867, the society had sent more than 13,000 American blacks to Liberia. The one-cent token featured Freed Negro standing next to a palm tree, a ship in the distance. Though many regard the one-cent piece a "hard times" token, and thus not acknowledged by the US mint as foreign coinage in its annual reports, it did function as coinage in the Liberian colony.

US Mint documents and records show that no coins were struck at any of the US Mints for foreign countries between 1855 and 1875. Starting in 1895, the United States Mint has struck coins for foreign countries almost every year. In 1984 the Mint ceased its production

of coins for other countries. Part of the explanation for this action was that all excess coinage capacity was allotted to the Olympic commemorative programs in 1984. Since the 1874 act states that may mint coins for a foreign country if the minting does not interfere with regular minting operations, foreign coinage was halted. Further Mint modernization programs since 1984 such as coinage press replacement and modernization; other commemorative programs and the introduction of silver, gold and platinum bullion coinage programs quickly consumed any significant excess coinage capacity after 1984.

Currently the Mint Administration directs foreign coin production to independent mints or other government mints. In 2000, the US mint struck a 1,000 kronur coin for Iceland. The piece celebrated the 1,000th anniversary of Leif Erickson's trip to the New World, and was issued in conjunction with a US commemorative silver dollar dated 2000 celebrating the same event. This marked the first time since 1984 that the US Mint had struck coins for another nation in its mints.

Foreigners in the Mint - A Mint Error News Exclusive Report

The United States mint has struck coins for the following countries:

Argentina	Honduras
Australia	Israel
Bahamas	Korea
Belgian Congo	Liberia
Belgium	Mexico
Bolivia	Nepal
Brazil	Netherlands
Canada	Netherlands East Indies
China	Nicaragua
Colombia	Panama
Costa Rica	Peru
Cuba	Philippines
Curacao	Poland
Dominican Republic	El Salvador
Ecuador	Saudi Arabia
Ethiopia	South Korea
Fiji	Surinam
France	Syria
French Indo-China	Taiwan
Greenland	Thailand
Guatemala	Venezuela
Hawaii	

Not all US Mint struck foreign coins were manufactured in the United States. The coins struck for the Philippines from 1920 until the outbreak of hostilities with Japan during World War Two are a good example. The Manila Mint (Mint Mark 'M') was opened in July 1920 as a branch Mint of the United States and struck coins for the Philippines while the islands were under administration of the United States before World War Two. The Manila Mint still maintains the distinction as being the only US Mint to physically reside outside of the United States.

Foreign Coins Made by the US Mint

Each coin made by the US Mint for another country was minted to the specifications dictated by the client country. Some of the clients of the US mint requested to be furnished with planchets to be utilized at their native mints in the coining process, as was the case with Argentina in 1919 and 1920. In the case of the Venezuelan one and two and half Centavos struck in the Philadelphia mint in 1876 and 1877, the US mint sub-contracted out to the Waterbury mint, owned by the Scovill Manufacturing Company, to supply planchets for foreign and regular US issues. The Waterbury mint provided the US Mint with many of the planchets for regular US one Cent and five Cent pieces from 1888 to 1906.

In some cases the client country would manufacture and furnish the dies to the US Mint to strike the coins, while other countries opted for the US Mint to produce the minting dies and to mint the issue. A third alternative that was utilized by some client countries, most notably the Dominican Republic, was the usage of a third party mint to produce the dies and then use the US Mint to manufacture the coins. This arrangement led to coins like the 1897 Dominican Republic One Peso struck in 1898 and 1899 by the US mint with dies made by the Paris mint that bear the "A" mint mark on the reverse near the bottom of the coin. These complex minting arrangements sort of reminds one of those "How many does it take to..."

jokes. In theory, a foreign coinage issue manufactured by the US mint could involve four or more parties:

The client country wanting the issue.

The mint that designed and produced the dies for coinage.

The mint that manufactured the coin planchets.

The US mint that actually minted the issue.

The mint or central bank that distributes the minted coinage into the economy.

In the case of the 1944 French two Franc pieces it is believed that the French Algerian provincial government issued the pieces into general circulation into the Algerian economy and not into the originally intended French commercial economy.

Over the years of producing coinage for other countries the traditional "P", for Philadelphia, Pennsylvania, "D", for Denver, Colorado, and "S", for San Francisco, California mint marks appeared on foreign. As mentioned before, a mint mark from another country could be present on a foreign coin produced by the US mint. The New Orleans, Louisiana mint never had a chance to display its "O" mint mark on a foreign coin since its one and only foreign issue was a 1907 Mexican silver 20 Centavos piece that bore the Mexico City mint mark from where the coinage dies originated.

Not all of the foreign mintages of the US Mint met with great success. Some mintages met undig-

Foreigners in the Mint - A Mint Error News Exclusive Report

nified ends in the melting cauldron such as the Chinese dollars and half dollars or the coinage of our present-day Hawaiian islands. While war and political turmoil damned some issues back to the melting pot, war was also the reason for such high demand for the US Mint to produce foreign coinage. Demand during the early, to mid nineteen-forties pushed coinage request to, at that time, all time highs as devastated World War Two participant countries in the midst of rebuilding required coinage to be produced in order for their respective economies to recover in the post war era. Coinage requests from these war torn countries supplemented and competed for the surplus coinage capacity normally reserved for the US Mint's usual client countries. Thus one can see in mintage reports at the time many coins reported in one year and dated with the previous years date.

While producing foreign coinage, the US Mint demonstrated its metallurgical talents producing numerous alloys it normally did not use for standard US circulating coinage along with coin shapes that the US Mint until that time was unfamiliar with. Coin shapes such as square, scalloped and hexagonal coins and those coins designed with holes in the center were required to be produced. While the US Mint did make limited run pattern coins with holes in the center, as documented in Judd/Pollack, the US Mint never executed a production run of such coins until the dated 2461 Siam (Thailand) One Satang it produced at the Philadelphia Mint in 1918. The US Mint followed up the holed

One Satang with additional holed foreign coinage issues such as the 1920 French Indo-China One Centime; the Fiji Half Penny and Fiji Penny produced from 1942 to 1943.

Scanning the mintage figures of numerous client countries of the US Mint over several years one can see the ongoing effect of economic policies of each country by the debasing change of coinage compositions used to issue certain denominations of that country. Over the years one can follow a denomination of a country changing from gold, to silver, to copper-nickel and finally to brass. Costa Rica in 1923 is one interesting example where US minted fifty and twenty-five Centimos coinage were re-struck or counter-struck by the Costa Rican government into higher one Colon and fifty Centavos denomination pieces because of their metal content and a revaluation of their currency.

Here are some interesting facts about some of the client countries and their coinage that the US mint struck for them.

Argentina

No finished coins, only planchets, were produced for Argentina.

Australia

All coins struck for Australia have either a "D", for Denver, or a "S", for San Francisco, mint mark. On the three pence the mint mark is located on the reverse to the right below the last numeral on the date. The six pence piece has the mint mark

located on the reverse at the bottom, just above the date. The shilling piece has the mint mark located on the reverse above the "N" in the word "Shilling". The Florin has the mint mark located on the reverse just above the date.

Brazil

Brazil bought raw planchets from the US Mint and its suppliers, no Brazilian coins were minted by the US mint.

Canada

Dimes struck for Canada can only be identified by the differences in the reeding. A different style collar was employed by the Philadelphia mint compared to dimes made by its Canadian counterparts.

China

Both the dollar and half-dollar are dated 1936, the twenty-fifth year anniversary of the Republic of China. Unfortunately the dollars and the half-dollars were shipped to Hong Kong and arrived at the same time Japan began invading China in World War II. The coins were never placed into circulation and most were subsequently melted.

There is nickel composition specimen of the one dollar known to exist, and may have been a final die trial.

A re-strike in 1949 produced a total of thirty million coins. These re-strikes were dated 1934, the twenty-third year anniversary of the

Foreigners in the Mint - A Mint Error News Exclusive Report

Republic of China. The Philadelphia mint produced the bulk of the restrikes with a total of 20,250,000, the Denver mint produced 6,550,000, and the San Francisco minting facility produced 3,200,000 coins. No US mint marks appear on any of the coins made for China by the US mint.

Colombia

In addition to the US Mint manufacturing coins for the government of Cuba, the Waterbury Mint in Waterbury, Connecticut, minted for Colombia the following pieces:

24,000,000 two and one-half Centavos (Y25) in 1881.

400,000 two and one-half Centavos (Y25) in 1902.

400,000 five-centavos (Y24, Y25) in 1888 and 1902.

Costa Rica

In 1942 the 2 Centimos issue was restruck as 5 Centimos pieces dated 1942. 274,342 coins were reported restruck by the Costa Rican government. Restruck coins are listed as Y58 in the Yeoman catalog. The US Mint did not participate in the restriking process in 1942. Also in 1923 a revaluation of larger denomination silver coins occurred. Most 50 Centimos were restruck/counterstamped as 1 Colon pieces (Y44).

You will occasionally see these pieces listed on some of the online auction sites as errors. These are not errors and you should not pay a premium for them. Though adding one

or two of these restrikes to your error collection as a conversation and educational piece is a great idea.

Cuba

Other private mints in the US such as the Providence mint also made coins for Cuba. In fact, the Providence Mint subcontracted out the actual manufacturing process to a company whose main line of business was as far as you can get from the numismatic field, they made air brakes!

Ethiopia

After Great Britain took possession of Ethiopia from Italy and returned it to Haile Sellassie and his government in 1941, Great Britain tried unsuccessfully to establish the shilling-cent system in Ethiopia. Ethiopian suspicion and a desire for a national identity lead to a new series of coins designed in Philadelphia by John Sinnock (obverse) and Gilroy Roberts (reverse). The bust of Haile Sellassie and the date 1936EE (1944) are on the obverse; the reverse has the Lion of Judah and the denomination of 1, 5, 10, 25, or 50 Santim (centime) in Amharic.

The US Mint in Philadelphia and the British Royal mint have both minted this series for the country. Ethiopia used these coins into the late 1970s or at least until the Socialist Ethiopian government issued its own set of coinage.

An interesting note that has parallels to the US Racketeer Nickel (Gold plated/coated US 1883 Liberty No

Cents Nickels), the original twenty-five centime coin was round like the fifty-centime piece and close to the same size. Unscrupulous persons quickly discovered they could silver plate the twenty-five centime coin and pass it for the fifty-centime piece. Few in the country could read the denominations on the coins due to low literacy rate. More than 400,000 twenty-five centime coins had been minted when they were withdrawn from circulation and retrofitted by hand with a scalloped edge. Later issues of the twenty-five centime coins were minted with a special milling collar to form the scallops of the coin.

Hawaii

Proofs were made of all denominations. No US mint marks are present on the coins. Claus Sprekels, the sugar king, used his influence to have the coins made for the Hawaiian Government.

The Hawaiian Dime was a substitute for the 12-1/2 Cent (Hapawalu) denomination specified in the original request to the U.S. Government. The 12-1/2 Cent (Hapawalu) would have required specially made blanks and usage of the Dime denomination would use a standard blank already manufactured and in use in US standard circulation coinage. Six Proof Dimes were made in September 1883 at the Philadelphia (PA) Mint for inclusion in four-piece sets containing the 10 Cent (Dime) piece, the 25 Cent piece, 50 Cent piece, and Dollar denominations. 250,000 circulation strikes were struck at the San Francisco, California Mint

Foreigners in the Mint - A Mint Error News Exclusive Report

without mint marks from November 17, 1883 through June 1884.

An additional set of 20 Proof Dimes were made at the Philadelphia Mint in 1884. Charles E. Barber and George T. Morgan prepared the dies for these Proof Dimes. The Proof Dimes were specifically created for inclusion in five-piece sets containing the containing the 10 Cent (Dime) piece, the 25 Cent piece, 50 Cent piece, and Dollar denominations, plus the originally requested 12-1/2 Cent (Hapawalu) coin.

Experts consider the 1883 Hapawalu to be “patterns” with italic 8’s in the date to be fabrications made outside the Mint (as were similar 1884 “patterns” of the Hapaha, Hapalua, and Dala denominations). The numismatic community did not know of these coins until 1954, when the collection of deposed King Farouk of Egypt was sold. Farouk owned many “patterns” from other countries that were made specifically for him, so it is highly likely that the 1883 and 1884 “patterns” with italic 8’s in the date were made for him at the time he collected.

One Hapalua with italic 8’s in the date is known struck over an 1880 Quarter Dollar. The reverse legend “UA MAU KE EA O KA AINA I KA PONO” means “The life of the land is perpetuated in righteousness.”

Iceland

As of the time of this writing, the 1000 Kroner proof coin featured with the US 2000 Leif Ericson Com-

memorative silver dollar was the last foreign coin produced by the US Mint. No US mint marks are present on the 1000 Kroner proof coins.

Korea (South)

Coins minted for Korea were dated to the Korean calendar. Coins issued in 1959 are dated 4292 and coins issued in 1961 are dated 4294. No US mint marks appear on Korean coins.

Mexico

All coins that were manufactured by the US Mint bear the mint mark for the Mexico City Mint where the coinage dies were manufactured and prepared. The New Orleans Mint made its only foreign coinage production run for Mexico by minting over five million 1907 twenty centavo pieces. Identical coinage runs for most issues manufactured by the US Mint were also produced in the Mexico City Mint in tandem with the US manufactured issues.

The San Francisco Mint in 1949 produced an 1898 dated 1 Peso re-strike originally minted in the Mexico City Mint composing of 90.27% silver and 9.73% copper. The original Mexico City Mint issue has 139 denticles on the reverse border while the US made San Francisco Mint re-strike has only 131 denticles on the reverse border.

Panama

No US mint marks are present on the coins struck for Panama. Some of the coins struck for Panama are on planchets identical to US coinage

of the time in weight, diameter and composition.

Peru

US mint marks appear only on Peruvian coinage made at the San Francisco Mint. The “S” for San Francisco is located under the letters “T” and “A” in the word “Centavos” on the reverse of the coin for the brass composite five, ten, and twenty Centavos coined between 1942 and 1943. On the Half Sol a “S” for the San Francisco mint is located on the obverse at the bottom, under the coat of arms. Additionally, the US Mint produced blank coinage planchets for the silver one Sol, gold one Libra, and gold one-fifth Libra from 1916 to 1919.

El Salvador

The 1928-S One centavo is the only coin minted by the US Mint for El Salvador that carries a US mint mark.

Saudi Arabia

All coins made for Saudi Arabia are dated with Arabic script. The Islamic date of 1356 was used on copper coinage and the Islamic date of 1354 was used on silver coinage.

From 1945 to 1947 the US Government had the Philadelphia Mint create two distinct sizes of gold weights or “discs”. At the time of their creation there was quite a bit of speculation as to what the purpose of these discs were for. One theory was that the discs were created for the Arabian American Oil Compa-

Foreigners in the Mint - A Mint Error News Exclusive Report

ny in order to pay the Saudi Arabian Government in gold for oil supplies during World War Two.

An official explanation offered in 1956 by the Director of the Mint was that the discs were made to furnish the Saudi Arabian Government with gold bullion in the weight that the Saudi Arabian Government had requested. The Director of the Mint also explained that any gold bullion cast by the US Mint or any US Assay Offices is customarily marked with its gold content and the eagle hallmark design of the US Mints and Assay offices. Furthermore, the Director of the Mint stated that the US Treasury Department considered the discs to be gold bullion and not coinage, and as such, were not authorized to be imported or held in the United States under the 1934 Gold Reserve Act.

Interestingly enough, some of the pieces were actually used as currency for a few years. Many of the gold discs were later melted in 1951 as material for a latter Saudi Arabian gold piece. Most of the larger discs were sold as bullion over the years. Between 1949 and 1950 unopened crates of these pieces were dispatched to the bullion markets of Bombay, India and sold on the open market.

Due to the nature of the handling and disposal of this issue these of gold weights or “discs” have become quite rare and very convincing counterfeits of these discs do exist.

Syria

Syrian coins made by the US Mint

have two dates, one using the standard calendar and one using the Islamic calendar, written in Arabic script.

Thailand (Siam)

The one Satang dated 2461 (Siamese/Thai Calendar) and produced in 1918 became the first massed produced coin by the US Mint to feature a center hole. No US mint marks are present on the coins.

Venezuela

Venezuela was the first official foreign coinage client for the US Mint. The 1 Centavo and 2½ Centavo coins made of a copper-nickel alloy were produced in the Philadelphia Mint in 1876 and 1877. The US Mint did not save exact alloy composition details on these coins. The US Mint also did not record an exact breakdown by year of the mintage when they appeared in the 1877 Director of the Mint report.

Coinage manufactured for Venezuela by the US Mint from 1876 until 1948 were inscribed “ESTADOS UNIDOS DE VENEZUELA”.

Coinage after 1954 was inscribed “REPUBLICA DE VENEZUELA”.

Planchet Suppliers to the US Mint For Business Strike Issues

The US Mint, while having its own metallurgical plant to produce blanks for its minting purposes over the years, had several suppliers of planchets to supplement its pro-

duction. Most notable is the Waterbury Mint with whom the US Mint had a very long term relationship. Planchets for precious metal bullion coinage is currently provided by several of the firms that supply bullion rounds to collectors and investors with metals obtained from the former silver strategic stockpile (currently depleted as of the publishing of this article) or the open market as in the case of platinum coinage.

Olin: As the longest continuous supplier of metal to the US Mint, Olin Brass’ Posit-Bond® clad metal is used in quarters, dimes and half dollars. In 1999, Olin Brass developed the unique alloy that the US Mint uses for the Sacajawea “Golden Dollar” coins.

Sherritt Gordon/Westaim, Fort Saskatchewan, Alberta, Canada, No longer produces coinage blanks. Blanks made by Westaim were provided by the Canadian Mint to the US Mint during the production ramp up in 1998 and 1999 in anticipation of monetary shortages due to the Y2K event and the introduction of the new one dollar coin.

PMX Industries is located in Cedar Rapids, Iowa, it is a wholly owned division of Poongsan Corporation of Korea since November 1998, and has supplied almost half of the coinage strips used by the U.S. Mint since 1992.

Tel: (319) 368-7700 Fax: (319) 368-7720, 5300 Willow, Creek Drive S.W., Cedar Rapids, Iowa 52404, U.S.A - www.ipmx.com.

Foreigners in the Mint - A Mint Error News Exclusive Report

The Providence Mint

Providence Mint, Gorham Manufacturing Company, founded 1818 by Jabez Gorham to produce jewelry items. Coinage did not start until the 1890's. This independent mint minted coins for Cuba from 1897 to 1898 and produced coinage for Ecuador in 1919 and Serbia in 1917.

Cuban Souvenir Peso (Y1, KM-M1), 1897, 90% silver, 10% copper, 10,000 pieces. The issue contains three distinct varieties and was struck in two separate locations. Unknown number of proofs exists for this date:

Variety 1: High relief, 858 pieces, 30 pieces were determined to be defective and subsequently destroyed. Coins were struck at the Dunn Air Brake Company, Philadelphia, PA. with dies manufactured and prepared by the Gorham company. Inscribed "PAT 97" at the base of the neck. Numerals of the date are widely spaced.

Variety 2: Low Relief, 4,286 pieces struck at the Providence Mint. Star right of "97" on the obverse is below the base line of the date. There is a letter "H" on the bottom right in the shield, on the reverse of the coin. No initials in the base of the neck. Numerals of the date are closely spaced.

Variety 3: Normal or Mid-Level relief, 4,856 pieces struck at the Providence mint. Star right of "97" on the obverse is above the base line of the date. There is no letter "H" on the bottom right in the shield. The stem

of the "R" in the word "souvenir" is shorter than the stem of the "R" in the other two varieties.

Cuban Souvenir Peso (Y2), 1898, 90% silver, 10% copper, 1,000 pieces. Unknown number of proofs exists for this date.

The Providence Mint also struck a large silver piece in connection with "William Jennings' Bryan's Free Silver" presidential campaign of 1896.

Due to the limited space of this venue I have assembled a sampling of known US coins on foreign planchets and foreign coins on US planchets to give readers an idea of the types of errors that have been found in connection with the mintage of foreign coinage. Tune up your "cherry picking" skills and may you have some very happy hunting experiences!

A Partial Registry of Known US Coins on Foreign Planchets

Since the early days of the error coin-collecting hobby, error collectors always feared seizure of their numismatic errors by the US Secret Service. Nevertheless, interesting and intriguing errors have still surfaced. Once the domain of a closed group of collectors, these US coins on foreign planchet errors shed light as to how quality control at the Mint was conducted over the years. The Mint could use millions of planchets of similar size yet different compositions in a given year which led to

blanks being mixed which is one of the reasons why this list was compiled.

New discoveries will surface each year as old collections turn over and newer generations of numismatists grow more sophisticated in their classification and research of such coins. I would fully expect any census to grow dramatically in the coming years.

(Year, Denomination and certifying agency, if available or known)

1876 Philadelphia minted 10 million 1 centavo, 2 million 2.5 centavos resulting in a 1877 1 cent on a Venezuela 1 centavo planchet 2.3 grams/19mm certified by NGC. The planchets for the Venezuela 1 centavo were manufactured by the Waterbury mint, Waterbury, Connecticut, under contract from the US Mint. (Numismatic News 24-DEC-2002)

1904 Liberty Nickel Struck on Foreign Planchet NGC the weight is 2.7 grams

1905 Liberty Nickel Struck on Haiti 5-Cent Planchet ANACS struck on a Haiti 5-Cent Planchet

Foreigners in the Mint - A Mint Error News Exclusive Report

1905 Liberty Nickel Struck on Haiti 5-Cent Planchet PCGS struck on a Haiti 5-Cent Planchet

1905 Liberty Nickel 2.77 grams NGC

1915 Cent struck in nickel

1920-P Cent struck on an Argentine 10-Centavo planchet.

1943 off-metal Cent authenticated as genuine, but it is not copper. It is somewhere in the neighborhood of 70 percent silver, 30 percent copper. Weight is 57.6 grains [3.752 grams] as compared to 48 for normal US copper Cent and around 42 for steel. Walter Breen authenticated it, after analysis through Mort Goodman identified it as probably struck on a planchet intended for the 25-cent-sukken piece for Netherlands Guiana. According to the Annual Report of the Director of the Mint for the fiscal year ending June 30, 1944, the Mint supplied 1 million coins to Curacao and 6 million coins to Surinam (Netherlands Guiana) during the 1943 calendar year.

1944 the Philadelphia Mint produced 25 million Belgium 2 franc coins from the same blanks as the 1943 zinc-coated steel Cents. 40+ steel 1944 Cents have been reported. (Coins, March, 1994, p. 34f / related story in Coin World, 1/31/94, p3)

1945-S Walking Liberty Half Struck On An El Salvador 25 Centavo Planchet NGC MS 63 This is the only known Walking Liberty Half Dollar struck on a Foreign Planchet for another country. It is on a planchet that

was produced for the El Salvador Silver 25 Centavo. The 25 Centavo was struck for only two years, 1943 and 1944. Since this Walking Liberty Half Off-Metal is dated 1945, it is on a left-over planchet that was stuck in the bin or hopper from the previous year or the coin was minted in late 1944 as the Mint was gearing up for the next year's production.

1944'P' Struck on a heavy planchet. Brilliant Uncirculated. 5.96 grams. At nearly 20% over the official weight for a Silver War Nickel, this coin was clearly struck on wrong planchet stock. Although this Nickel has the luster and color of a Silver War Nickel, it is possible that this piece was struck on a planchet intended for a foreign coin struck at the Philadelphia Mint, but no such corresponding coin can be found in Steiner and Zimpfer for this time period.

1944 Cent thick planchet specimen (Pollack #2078) is more likely a mint error struck on a foreign planchet or on incorrectly rolled stock

1945 Cent Struck on Netherlands East Cent Planchet 2.32 grams (35.8 grains), 18.0mm

1945-S Half Dollar on an El Salvador 25 Centavo planchet NGC

1951 Roosevelt Dime struck on a 1951 Costa Rica 5 Centimos, double denomination, authenticated by ANACS. Roosevelt Dime off-metal strikes are rare due to the fact that the coin or planchet has to be smaller than the Dime blank. There are only a few Dime off-metals known. This

piece was struck on a previously struck 1951 Costa Rica 5 Centimos. The Costa Rica coin has a weight of 15.43 grains and is composed of 75% copper and 25% nickel. These coins were only struck at the Philadelphia Mint in 1951 and 1952, although they are all dated 1951.

1956 Roosevelt Dime Struck on a Struck Copper 1956 Honduras 1 Centavo ANACS Brown

1967 NGC Cent struck on 5-Cent thickness. Weighs 3.8 grams (???)

1968-S Cent Struck on a Philippine 5 Centavos Planchet (Brass 60%, Cu Zinc 40%)

1968-S Proof Kennedy Half Struck on a Philippine 50 Centavos Planchet ANACS

1970 10c ANACS struck on aluminum scrap (cut in half) may be struck on a Nepal Paisa planchet

1972-D Lincoln Cent PCGS MS-60 Struck on a Philippine 5 Sentimos planchet.(Brass)

1972-D Quarter Dollar PCI EF40 on an unidentified planchet

1972-S PROOF 25c struck on an already Japanese 10 Yen. A proof double denomination on a foreign struck coin, Only 1 known PCGS. The US has never officially minted any coins for Japan. This coin was probably snuck into the Mint, over-stamped and the secreted out of the San Francisco facility.

2000-D Sacagawea Dollars on outer ring intended for Canadian, bi-metallic coin

2000-D Cent NGC 1.7 grams

2000-D Sacagawea Dollar PCGS Struck on a Ghana 100 Cedis Ringed Planchet the Ghana Blank is from a Bi-Metallic coin.

A Partial Registry of Known Foreign Coins Struck on US Planchets

While most collectors will focus on the US Mint produced foreign coinage issues and US coins struck on foreign planchets, to fully explore this subject we also need to examine the reverse (flip-side) of this coinage equation. How often did foreign coinage runs get contaminated

with US planchets? While some foreign issues contained compatible US standard planchets, exact same metallurgical composition, weight and diameter, like the 1944 Belgium Steel two Francs piece that was struck on surplus 1943 zinc coated steel war cent planchets, thus making a distinction from correctly minted pieces to incorrectly minted coins impossible, other US minted foreign issues contained totally different specifications that one can only wonder how they slipped through the inspection process of not only the US Mint but the inspector of the client country for whom the pieces were destined.

In June of 2000, a Harmony Millennium commemorative twenty-five Cent piece was found struck on a Type I Planchet intended for a US Five Cent piece. What makes this particular piece very interesting is that it was not made in the US Mint but in the Royal Canadian Mint. A true foreigner! The US planchet was made at, or for, the Royal Canadian Mint. The Royal Canadian Mint in 1999 and 2000 supplied planchets for 5c pieces and Sacagawea Dollars to be sold to collectors by the US Mint and to assist and alleviate the production constraints caused by the introduction of the new Sacagawea Dollar in 2000. In addition to this discovery, a Canadian 2000 Elizabeth II 50 Cent piece was found struck on an US One Dollar Sacagawea planchet.

Curved Clip Coins

By David J. Camire (ngccoin.com)

We have witnessed a resurgence of non-genuine curved clip coins entering the market place. While most “faked clips” are usually easy to spot because of the crudeness of their fabrication, this is not always the case.

Learn the Diagnostics of Authentic Mint Made Curved Clips

We have witnessed a resurgence of non-genuine curved clip coins entering the market place. While most “faked clips” are usually easy to spot because of the crudeness of their fabrication, this is not always the case. A substantial amount of elaborate fakes of coins dated within the past two years have surfaced. Who is making them is still unknown, but the lure of easy money is probably the driving force. So how can a mint made clip be distinguished from a clip fabricated outside the mint after striking? There are three foolproof characteristics that we’ll examine which will answer this

question: cut and tear marks, weak rims, and metal flow.

It is important to note that clipped planchets are actually incomplete planchets and occur pre-striking.

blanking machine which punches out metal disks from this strip. The resulting blanks (Type 1) are only slightly larger in diameter than the finished planchets. The blanks are then annealed and washed (Type 2). The final step comes when these blanks have a raised rim applied to them (a process called upsetting) from which they emerge as planchets.

With this in mind, the first thing to look at is the shape and edge of the clip. The clip must have an arc similar in fashion to that of the coin. It may not be the perfect shape, because it gets distorted slightly when struck, but it should be close. Therefore, if another coin of the same denomination is placed alongside this coin, it should almost “fit” into the area that is missing.

Planchets are the round material upon which the dies impart an image. They begin as long coils of metal that are 13 inches wide. These coils are fed into the

Next, by looking at the edge of the clip area, there will be tell tale signs that it was “punched out” of the strip. Photo #4 illustrates what is referred to as “cut and tear” marks, which

Curved Clip Coins

are always present on mint made clips. This phenomenon occurs during the first stage of making the planchets when it is “punched out” of the metal strip. The punch does not penetrate the strip completely. Instead, it cuts only partially through, the planchet then being “pushed” the rest of the way through a shearing action.

The next area to look at is the rim of the coin (obverse and reverse) that is directly opposite the clip. The rim in this area will be wider and weaker than the rest of the coin which can be seen in Photo #5. This occurs because the planchet lacks upsetting in this area. The rim could not be “raised,” since there was no opposing side to force it up.

Lastly, we will look at the design elements of the coin surrounding the clip. Photos #6 and #7 are of the obverse of the coin by the clip area. When a coin is struck, metal

will flow into the dies. It will flow into the areas of least resistance first. For this reason, the details (wording and design elements) of the coin will be distorted in the areas closest to the clip. There will be “flow lines” where the metal is

moving towards the clip. The same will be true of the reverse of the coin. Additionally, the edge of the clip should be rounded on each side of the coin since the metal is flowing and curving into that area of the clip. This can be seen in Photo #8.

Clips are measured in terms of percent of missing metal from the planchets. In this case, these planchets are missing 15% of their metal (weighs 4.5 grams) or have a 15% curved clip. Since curved clips form an arch, gauges are usually employed to measure clips which are measured in increments of 5%. Curved clip is used (with no mention of %) when less than 5%.

Photos 1 & 2: Clipped 2005-D Bison 5¢.

Photo 3: A strip from which planchet blanks are cut.

Photo 4: A close up of the above clipped coins edge, showing “cut and tear.”

Curved Clip Coins

Photo 5: The broad and flat rims area opposing the clip, where the planchet was not upset. Obverse is at left, and reverse at right.

Photo 6: A close up of obverse clipped edge, showing distinctive directional metal.

Curved Clip Coins

Photo 7: Another close-up of obverse clipped edge, also showing metal flow.

Photo 8: The curved clip as seen on reverse.

Pattern Overstrike Certified by NGC

By NGC (ngccoin.com)

Previously Unreported and Believed to be Unique

Numismatists at NGC identified an unusual overstruck US pattern, which lends some insight into the production of the pattern issues of the late 1860's and 1870's. The coin is an 1870 Standard Silver dime showing Liberty with a cap and three stars (J-839). The undertype is also an 1870 Standard Silver dime, struck in copper, showing Liberty with tiara without stars (J-845).

Patterns are often referred to by their Judd Number, the catalogue reference number assigned to them in *United States Pattern Coins, Experimental, and Trial Pieces*, by J. Hewitt Judd. Both J-839 and J-845, the coin and its undertype are Standard Silver series patterns. If released, these coins would have been used to redeem Fractional Currency notes, but legislation authorizing their issuance was never passed.

The Standard Silver pattern series was struck in both 1869 and 1870 and consists of over 200 different issues. Three different head styles of Liberty were used to make pattern dimes, quarters, and half dollars,

Pattern Overstrike Certified by NGC

and all are married to two different reverse designs. All were struck in silver, aluminum, and copper, and with reeded edge and plain edge. Other alloys and variations exist.

This great variety and abundance of pattern coinage was made expressly for collectors who purchased them in sets from the Mint. Since no production records were kept, many view the practice of striking pattern coins as a clandestine enterprise undertaken by Mint employees for their own profit.

But why was this overstrike produced? Since this pattern was made for collectors, one speculation is that an example of J-839 was needed to complete a set. None were available and a J-845 was taken from inventory to be recoined. This is further corroborated by the relative rarity of both coins, as J-845 is more common than J-839. Only 4 to 6 examples of J-839 are known, while an estimated 7-12 examples of J-845 are known, according to the Judd reference.

Very few overstruck patterns have been identified, but this is the second such discovery that NGC has made this year.

Photo to the right:

An image progression shows the location of the undertype details. The top coin is a detail of J-839, while the bottom coin is J-843 which is the same design as J-845 but is struck in silver.

Rare Russian Swedish Overstriking

by Martin Wettmark

This coin has been in my collection for 10 years. It was first struck as a Swedish 1 öre SM 1746 and then overstruck in Russia as a 1 Kopek 1758. They are in a very nice book about older Russian errors and overstrikes by two Norwegian numismatists Bernhard F Brekke and Tom Willy Bakken. In this book they list 4 known such Russian-Swedish overstrikes and the show pictures of two of these. The coins in the book and my coin in quite poor condition, but none of them display the year from the first striking of the Swedish coins. I have asked myself how these overstriking were possible. One theory is that the Swedish coin was sold together with other metal as junk to the Russians. I found this coin in the United States at a Russian coin dealer in Chicago at a reasonable price. I guess today's high interest in Russia (coins, art, jewelry) made it a good finding.

New From Krause Publications: Strike It Rich With Pocket Change *Error Coins Bring Big Money*

by Brian Allen & Ken Potter
NEW Second Edition

This is the long awaited second edition to this Numismatic Literary Guild Award Winning book! It covers important die varieties and errors known on United States coins from cents through dollars that can still be found in pocket change! It is the most in-depth work of its kind covering, doubled dies, repunched mintmarks, over mintmarks, abraded die varieties, mules, counter clashes, transitional errors, rotated reverses, edge lettering errors on Presidential dollars, die design changes, striking errors, planchet errors, etc. Expanded to include 50 more pages than the first edition, it spans 320 pages with over 800 photos show-

ing you where to look and what to look for on every single variety coin listed. It contains important information including updated values of the coins and important cross reference listing numbers to the most

popular listing services out there. It also contains important chapters on worthless forms of doubling often confused with valuable types of doubling, grading coins, tools of the trade, coin preservation, a treatment on minor varieties, a chapter on common myths associated with error-variety coins, how to buy and sell, finding States Quarter Errors and Varieties, terms and definitions, recommended reading, joining clubs and more!

Visit <http://koinpro.tripod.com/books.htm> for more information.

ADAMS FIRST SPOUSE BRONZE MEDAL MULE DISCOVERED

A new mule has been recently discovered on the U.S. First Spouse Medal. The mule is a pairing of a 2007 Abigail Adams with the reverse die intended for the 2008 Louisa Adams Medal.

PCGS Grades First Native American \$1 Coin Missing Edge Lettering

by Jaime Hernandez

On March 6, 2009, PCGS received the first reported and only-known Native American dollar with the edge lettering missing.

Native American Dollar Showing Missing Edge Lettering

PCGS Authorized Dealer and error coin expert Fred Weinberg submitted the coin to PCGS.

First PCGS-Certified Missing Edge Lettering Native American Dollar. Courtesy of Fred Weinberg from Fredweinberg.com.

According to Mr. Weinberg, “this is the same coin that was submitted to Coin World for a press release. So far, just this one Native American coin with missing edge lettering has been found, but I wouldn’t be surprised if a few more showed up. The 2009 Native American coins have not been available through banks or normal commerce, so obtaining these coins has been challenging.”

So far, the 2009 Native American Sacagawea dollars are only available from the U.S. Mint in \$25 rolls or \$250 boxes. In fact, the current only-known 2009 Native American dollar coin with missing edge lettering was found by someone who ordered the \$250 box directly from the Mint. Therefore, cherry pickers should try these sources to search through coins until they are released into circulation.

Another recent variety reported for the Native American dollars is weak edge lettering. Weak edge lettering coins have weakness in one letter or more on the edge lettering inscriptions. Mitch Spivack, PCGS

“Weak Edge Lettering – Native American Dollar”

Authorized Dealer and outside expert, said he recently found an example graded PCGS MS67 with large sections of several letters completely missing – therefore the coin received a weak edge lettering designation from PCGS. Collectors should be aware of these varieties as well as they do a command a strong premium.

The reverse of the 2009 Native American dollar features a Native American woman in a one-piece Indian robe. The woman is depicted

PCGS Grades First Native American \$1 Coin Missing Edge Lettering

sowing seeds in a corn field along with beans and squash. Arched above her are the words "UNITED STATES OF AMERICA" and below the design is the \$1 sign representing the face value of the coin. The date and mint mark should be inscribed on the edge of the coin. Coins missing the edge inscriptions are referred to as missing edge lettering coins and are considered mint errors.

All 2009 one dollar coins should go through an additional minting

process in order to receive the edge inscriptions. Under normal circumstances, business strike one dollar coins are dumped into large hoppers. From these large hoppers the coins are then transported to a Schuler edge-lettering machine to receive the edge inscriptions. At times a mint employee will fail to pass these one dollar coins through the edge-lettering machine. This will then result in one dollar coins being produced with the missing edge lettering and in return escape

the Mint and enter circulation.

In the past, Missing Edge Lettering dollars with about 1,500 or fewer known examples have commanded thousands of dollars. Currently, this specimen is the only Missing Edge Native American dollar. Only time will tell if this will be a very scarce coin and the ultimate question is, how much is the 2009 Native American Missing Edge dollar worth?

Now Available From Zyrus Press

STORY OF THE BOLIVIA 1942 50 CENTAVOS STRUCK AT THE PHILADELPHIA MINT ON US WARTIME NICKEL PLANCHET

BY TIMOTHY D. ZIEBARTH, PH.D.
ANA# 3130037

I am an advanced collector of Foreign Coins Minted at United States Mints. Of the approximately 950 issues (not counting varieties) for 41 countries that have been minted by US Mints in Philadelphia, San Francisco, Denver, New Orleans and West Point since 1875 as authorized by the Act of Congress January 29, 1874, I have managed to add to my collection all but 31, 11 of which are modern (post 1964) and 7 of which may not exist, leaving 13 yet to find. Most examples in the collection are high-grade, including several of the finest known.

In 2006, Heritage offered a number of fine and rare examples of these coins in their June 2 Whittier Collection of Latin American Coinage, Auction #410. Included in that auction was Lot# 16308 of 3 raw coins, whose description read:

“Republic 50 Centavos 1942 - Three Varieties, KM182a.1, original strike in bronze, nice BU and original strike in silver, choice BU and the only reported example, and KM182a.2, restrike with less distinct strike, nice BU.

Having both bronze issues, the KM182a.1 “original” (meaning Philadelphia) and the KM182a.2 LaPaz minted restrike, in my collection was appealing especially because they appeared to be very high grade. The “original strike in silver, choice BU and the only reported example” was intriguing: Krause lists only one Pattern as “Pn57 1942 — 50 Centavos. Silver. Struck at LaPaz. KM#182a.1”, and I assumed this was perhaps that coin.

I won the Lot, and instructed Heri-

tage to have these coins sent directly to NGC for certification, as many of the already certified coins in the auction were encapsulated with the “Whittier Collection” attribution on the slab label, and I wanted the same labeling on these coins.

When I received the coins from NGC, I was surprised to find that both bronze examples were in fact Philadelphia minted; both had plain edges. (The LaPaz restrike has a reeded edge.) I was even more surprised to see the “silver” example labeled “1942 4.9G Bolivia 50C Struck ON 20C PLANCHET MINT ERROR MS65”.

While I was delighted with the grade of MS65, I was somewhat disappointed that this coin was apparently a Copper-Nickel planchet error, and not the anticipated silver Pattern coin KM-Pn57.

Over the course of the next year, I looked at the coin a number of times and was continually struck by the color; it appeared much more brilliant and “silvery” than any C/N alloy coin I had ever seen. Referring to Greg Mirsky’s wonderful work on mint errors caused by having both Foreign and Domestic coins being made in the same US Mint at approximately the same time (see Mint Error News Magazine, Vol I, Issue II, page 16), and Krause World Coins 2006 Edition, it was apparent that something about NGC’s attribution of this coin was amiss. There was no “20C” (I assumed NGC meant “cent”, “cenavo”, “centesimo” or perhaps “centime”) or any other denomination produced for any Foreign Country within several years of 1942 that had a 4.9 gram C/N planchet.

I took the coin (now NGC slabbed) to the CSNS Show in St. Louis in May, 2007 and showed it to a number of error dealers, including Fred Weinberg. I asked each one two questions: 1. had they ever seen a coin like this one, and 2. did the coin appear to be Copper-Nickel alloy, or Silver. The responses to 1. were unanimously “NO”, and to the second question I received about a 50:50 split between C/N and Silver.

At the same show, I presented the coin to Mr. David Lange, Research Director, who was representing NGC at their booth. He agreed something may be amiss; the coin appeared clearly to be struck on an undersized planchet, and that the planchet did not appear to be Copper-Nickel. Mr. Lange suggested I contact NGC directly and have them re-look at the coin.

On the flight back to Denver, I was still mulling over the problem when that proverbial “light bulb” went on. I had looked extensively at what other Foreign planchets may have been floating around the Philadelphia mint in 1942 (and for years before that, as an old planchet may have been lost in the machinery for years), but I had NOT looked at what US coins may have been on-site at the time. A quick look at the Redbook told me all I needed to

know: of course we were minting 5 cent coins containing the “War” alloy of 56% copper, 35% Silver and 9% Manganese. Precisely a 5 gram planchet with a “not C/N and not Silver” appearance! The Bolivia 1942 50 centavo coin was specified to be minted with a 5.5 gram, 24.3 mm diameter planchet whereas the US War nickel used a 5.0 gram planchet with a 21.1 mm diameter.

Working directly with Ken Krah,

Vice-President of NGC, via Email, I was invited to send him the coin directly. I described the issue to him, and my suspicion that in fact the coin was struck on a War Nickel planchet, and requested that NGC perform non-destructive analysis of the coin to perhaps solve the mystery. This they promptly did, with the Semi-Quantitative X-Ray analysis by Ledoux & Company of Teaneck, NJ coming back as:

Copper:	57.5%
Silver:	36.3%
Rhodium:	5.7%
Iron:	0.4%

Although the reported content of Rhodium and Iron might be disconcerting, being a Chemist and having managed an independent testing laboratory myself in the 1970's, I knew that this type of analysis was a) truly semi-quantitative (a few % error was not unusual without a known equivalent alloy as a reference), and b) mis-assignment of minor elements is common due to overlapping emissions from major elements. The key results were, of course, that the alloy was principally Copper and Silver, and not Copper and Nickel, in the proper proportions for the US Wartime 5 cent issues. To put a final "nail in the coffin", I may elect to ask Ledoux to re-inspect their X-Ray results to see if in fact the Rhodium/Iron identification could have been misconstrued from an actual Manganese component, or I may send them an actual US War Nickel to see if the same mis-assignment for these two minor compositional elements is made.

Nonetheless, NGC agreed with this

overall conclusion, and re-encapsulated the coin with its proud new attribution as:

1942 BOLIVIA 50C
ON US 5C BLANK 4.9G
MINT ERROR MS 65
WHITTIER COLLECTION

It stands as the only, and therefore finest known example, of error. This unique coin now holds a prominent place in my collection. I

learned that tracking down a proper attribution for an error coin can be stimulating, fun and rewarding, that it takes dogged perseverance, but that sometimes even the experts need help from private collectors. It's truly a grand experience, pleasure and privilege when even an avid collector can actually act and feel like a numismatist. Error collecting presents this opportunity at almost every turn!

Bolivia 10 Centavos Mint Error Set

Here is an incredible set of Bolivia 10 Centavos mint errors. They are struck on a Feeder Finger, struck in Aluminum, struck in Gold and struck in Copper. The copper is struck with two reverse dies. The gold striking is unique.

Mike Byers, Professional Numismatist since 1978

Byers Numismatic Corp. A California Corporation Since 1980
Mike Byers is the Publisher & Editor of Mint Error News Magazine

World Errors

by Fred Weinberg

Here are some more rare and unusual major mint errors from around the world that I wanted to share with the readers of Mint Error News Magazine.

1968 Liberia Fifty Cents PCGS Proof-67

Struck on U.S. Clad 25¢ planchet. Struck at the San Francisco Mint. Very rare.

1968 Liberia Five Cents PCGS PF-66 Red Struck on U.S. Cent planchet.

Struck at the San Francisco Mint. Rare Country/Proof error.

World Errors

1978-S Roosevelt Dime PCGS PROOF-69 Unique-Struck on Philippine 10 Sentimos plan. WT: 2 grams- 70% CU, 18% ZI, & 12% NI. I purchased this coin directly from the party who removed it from a U.S. 1978 Proof Set. The coin is frosted obv/rev, & is the only known PROOF example of this off-metal coin.

1979 Canada cent PCGS MS-64 Deep Die Cap struck on 5.6 gm. Copper-Nickel plan.
A Dramatic Off-Metal Deep Die Cap error on an unidentifiable world coin planchet.

2006 Chile 100 Pesos PCGS MS-66
Struck 10% Off-Center & Plain Edge Dramatic looking Bi-Metallic.

World Errors

2006 Chile 50 Pesos PCGS MS-65 Struck 20% Off-center on 1985 Mexico 5 Peso coin. UNIQUE! This 24 year-old 1985 Mexico 5 Pesos coin was struck in 2006 20% off-center with Chile 50 Pesos dies. Both dates (1985 and 2006) show. Probably a “helped” coin, but still unique & dramatic.

2007 Chile 5 Pesos PCGS MS-67/MS-66 2-pc. Mated Pair.
Coin #1 is Double Struck and fits into obverse of coin #2.

World Errors

2008 Chile 1 Peso PCGS MS-66

Struck on Bronze 5 Peso planchet (1 Peso should be aluminum).

2008 Chile 100 Pesos PCGS MS-62 Struck on 500 PESOS Bi-Metallic Core ONLY. This Denomination/Design should be on a Copper/Nickel core like previous four listings. The only Bi-Metallic coin struck on a large denomination core known.

2008 Chile 100 Pesos PCGS MS-67 Struck on outer ring only.
This "ring" has some design on it that should have been on the core.

2000-P "Cheerios" Dollar

Editor's Note: From the Heritage auction listing:

The discovery coin of the now-famous Cheerios dollar variety, so named because nearly all known examples were originally found in occasional boxes of Cheerios cereal as part of a U.S. Mint promotion of the new series. Five years later, collector Pat Braddick noticed a design difference: the tail feathers of his Cheerios dollar had diagonal detail absent on normal business strikes. On June 20, 2005, NGC certified Braddick's coin as the discovery specimen for the pattern Cheerios dollar.

This lot includes: one MS66 2000-P Cheerios dollar certified as the discovery specimen by NGC; a 2000 cent still housed in pristine Cheerios plastic packaging; one scarce presentation finish 2000-P Sacagawea dollar given by the U.S. Mint to its obverse designer, Glenna Goodacre, who has autographed the ICG holder that holds the coin; a 2000-P Sacagawea dollar in a small custom holder that bears an autograph from Sacagawea model Randy'L He-dow Teton; and a folder. This folder houses the 2000 Cheerios cent along with an NGC photo proof of the discovery coin and copies of various Cheerios-related correspondence, NGC press releases, and Coin World articles. (#147231)

CONECA

The Combined Organizations of Numismatic Error Collectors of America

CONECA is a national numismatic organization devoted to the education of error and variety coin collectors. CONECA focuses on many error and variety specialties, including doubled dies, Repunched mintmarks, multiple errors, clips, double strikes, off-metals and off-centers -- just to name a few. It publishes an educational magazine, The Errorscope, which is printed and mailed to members bimonthly. CONECA offers a lending library, examination, listing and attribution services; it holds annual meetings at major conventions (referred to as Errorama) around the country, and offers auction services to its members. Please visit conecaonline.org and enjoy!

CONECA Variety Attribution Services

CONECA offers two attribution services. One service enables members and non-members to send their coins directly to an authorized CONECA attributer. The other service is offered through the numismatic grading firm of ICG and enables CONECA members and non-members to have their coins attributed by a CONECA attributer and then graded and slabbed by ICG.

CONECA Error Examination Services

CONECA offers two examination services. One service enables members and non-members to send coins to an authorized CONECA examiner who will return an opinion of each coin's error classification. The other service is offered through the numismatic grading firm of ICG and enables CONECA members and non-members to have their coins examined by a CONECA examiner and then graded and slabbed by ICG.

BYERS NUMISMATIC CORP

MIKEBYERS.COM

The Largest Dealer of the World's Rarest Mint Errors™

U.S. & WORLD MAJOR MINT ERRORS • DIE TRIALS • NUMISMATIC RARITIES

Consign Your Coins to mikebyers.com

Terms and Conditions

We are offering this service for error collectors and dealers alike. In order to post your item on our website you must agree to the following terms and conditions.

1. All major U.S. mint errors are accepted if they are certified by PCGS, NGC, ICG or ANACS.
2. The approximate value of each item must exceed \$5,000.
3. Each item must meet our inventory criteria in terms of desirability and market value.
4. Byers Numismatic Corp charges a 10 % commission for each sale.
5. The minimum time for any listing is thirty days.
6. Seller agrees to a seven day return privilege from date of receipt.
7. Seller agrees to use an escrow service if requested by the buyer.
8. We reserve the right to deny or cancel any listing at any time.
9. All listing are subject to prior sale.

Please do not offer us the following:

1. More than two coins bonded together.
2. Caps more than ½ inch high.
3. U.S. Errors that were obviously and intentionally struck as error coins. No impossible mint errors.
4. We only accept consignments of U.S. Errors that were legitimately released through normal distribution channels.

Scanning Specifications

1. Scan both the obverse and reverse of the entire holder.
2. Scan with a resolution of at least 300 dpi.
3. Save the picture in jpeg format (jpg).

Information Requirements

In addition to e-mailing a photo of your item, please include the following information:

1. Name, Address & Phone Number
2. E-Mail Address
3. Asking Price

After your item is listed, we will contact you by e-mail with any offers and questions. Once a price is agreed upon we will handle the entire sale for a 10% transaction fee, which includes all costs (eBay fees, grading fees, webmaster charges, postage and registration fees, insurance, paperwork, etc.).

If you have a Mint Error collection for sale or would like to sell your duplicates and do not want to consign your coin(s), we can purchase your entire collection outright. Please contact us at mike@mikebyers.com.

Presidential Dollar Mint Errors

The Missing Edge Lettering discovery on the George Washington Presidential Dollar was the biggest news story of 2007. Mint Error News has published a special edition of the magazine showcasing the Washington Dollar Missing Edge Lettering mint errors which can be viewed on minterrornews.com. Presidential Dollars featuring John Adams, the second president, were also discovered with the Missing Edge Lettering.

The numbers of Missing Edge Lettering Presidential Dollars on sub-

sequent presidents has been greatly reduced due to new procedures at the U.S. Mint. An example would be President Monroe Dollars that are missing the edge lettering. The number discovered so far is approximately 20.

Other major mint errors in the Presidential Dollar series are very scarce. Only two or three off-centers have been reported and only a handful of double struck coins have surfaced. Several Presidential Dollars have been discovered missing either an obverse or reverse clad

layer. A few of these Missing Clad Layers are also missing the Edge Lettering. To date, three Proof Presidential Dollars have been certified by NGC that were stuck on elliptical planchets. PCGS has certified a few with clips and a few that are broadstruck. Some of the major mint errors on Presidential Dollars are featured here.

Also featured in this article is an up-to-date chart showing the number of Presidential Dollars *Missing Edge Lettering* that are known or estimated.

Mint Error News Price Guide

- Entire Price Guide Updated 6/1/09 -

This price guide is brought to you by Mint Error News. It has been compiled by many of the top major mint error dealers.

This price guide is a guide. Prices fluctuate due to the date, grade, eye appeal and how dramatic the striking error is. Rarity is also a factor. The price is sometimes based on the rarity and grade of the type of coin as well as how rare the error is. The price can also vary depending on whether two collectors are bidding for the same rare major mint error. When purchasing a mint error, it is important to use multiple resources to determine value, as there are many mint errors that do not fit into one category.

Proof Errors

Proof coins are struck by technicians who hand feed the blanks into special presses. They are produced, examined, and packaged using extreme quality control. It is very unusual to find major proof errors. A few broadstrikes, off-centers, double strikes in collars and off-metals have been known to be found in sealed proof sets. Proof errors are aggressively sought after by many error collectors.

A very small group of Proof errors recently came from a collection that was auctioned by the State of California. The U.S. Secret Service inspected and released this collection to the State of California determining that it was legal to own. The State of California then auctioned the collection and it has been dispersed since the sale.

Denomination	Broadstrikes	Die Trials	Double/Triple Strikes	Off-Center Strikes	Partial Collar Errors
Proof Lincoln Cent	\$1,500 - \$2,500	\$1,000	\$4,000	\$1,500 - \$3,000	\$500
Proof Jefferson Nickel	\$2,500 - \$4,000	\$4,000	\$6,000	\$2,000 - \$5,000	\$1,000
Proof Clad Dime	\$3,000 - \$5,000	\$4,000	\$6,000	\$2,500 - \$5,000	\$1,250

Mint Error News Price Guide

Broadstrikes

A broadstruck error occurs when a coin is struck without the collar to form the rim and edge that is part of the shape of the coin. Coins can be broadstruck on either type one or type two planchets. When a coin is broadstruck the blank being fed into the collar will spread and distort outward as it is being struck because the collar isn't in the correct position to retain it.

Mint Error News Price Guide

Partial Collars

Partial collar strikes occur when there is a malfunction of the striking press. This causes the collar to be in an incorrect position. The lower die (usually the reverse die) is recessed in the collar. This allows the coin which is going to be struck to have a formed rim. After a coin is struck the lower die raises upwards, pushing the struck coin out of the collar and ejecting it. If a blank entering the collar is not properly seated, it will only have partial reeding as it is struck. The edge of this coin will have a partial reeding and a partial blank surface area. Recently, the Mint has installed new machinery where either die can be installed in either position.

Uniface Strikes

Uniface coins occur when there have been two blank planchets in the press at the same time. The other blank will obstruct the die on either the obverse or reverse side, which will prevent it from having that design on the coin. There are many different variations involving uniface errors. In addition to having a 100% blank obverse or reverse, a coin can be struck off-center, with a blank planchet in the collar which will obstruct one side of the off-center. There are also mated pairs which have a combination of multiple errors which can include a side which is uniface. Finally, there are uniface strikes due to a die cap which adhered to the die, forming itself in the shape of a die and striking blank planchets.

Denomination	Uniface Obverse XF	Uniface Obverse Unc	Uniface Reverse XF	Uniface Reverse Unc

Bonded Coins

Bonded coins occur when the feeder system, which supplies blank planchets to the coin press, malfunctions and jams. When this occurs, a struck coin is not properly ejected and another planchet is fed into the collar and is struck. This struck coin will land on top of the previously unejected strike. These coins will then crush and bond together. This may occur many times as more coins bond.

Denomination	2 Planchets	3-4 Planchets

Coins Struck on Feeder Finger Tips

After a recent tour of the U.S. Mint in Philadelphia, it was discovered that the minting process had changed to some degree. One of the changes was that “feeder fingers” were used during the striking of all denominations of U.S. coins. Prior to this tour, U.S. coins that were struck on feeder finger tips were authenticated and described as being struck on aluminum scrap. Coins from all modern denominations have been discovered that were struck on the tips of these feeder fingers.

Struck Fragments

The blanking press takes the coils of metal strips and punches blanks out of it, ejecting the webbing at the other end. The webbing is cut into small scrap pieces to be melted and recycled. Occasionally a scrap piece will be mixed with the blank planchets and struck by the dies. Struck fragments are rare in the larger denominations. These can be uniface or die struck both sides and are very rare on type coins.

Denomination	Uniface	Die Struck Both Sides
Indian Cent	\$1,000	\$2,000

Mated Pairs

Mated pairs involve two individual coins with different errors that were struck together at the same time. Mated pair error combinations can be found in most error types and come in many shapes and sizes. Mated pairs can be overlapped when one of the coins is struck off-center on top of another coin. Another type involves a brockage where a struck coin was perfectly centered on a blank and restruck. Some mated pairs involve a die cap where the cap and brockage coin are discovered together, but this is a scarce find.

The rarest mated pair type involves two die caps (obverse and reverse) where both dies were capped at the same time and both die caps are mated. This last type is extremely rare and there are only a few known examples of mated pairs involving an obverse die cap and reverse die cap. There are several of these mated pairs known on Kennedy Halves including two dated 1976, which is the Bicentennial year. One of the most spectacular mated pairs involve two Barber Dimes, an obverse die cap mated to a reverse die cap and are unique.

Mated pairs can also involve an off-metal where a smaller blank planchet or smaller struck coin was struck on top of a larger coin. This type is extremely rare. The most spectacular pair known is a double struck Franklin Half which was mated to a Lincoln Cent. The Lincoln Cent blank was on top of the obverse of the struck Franklin Half. This pair was then struck together. It is unique.

Transitional Errors

A transitional error occurs when a coin is struck on a planchet from a previous year with different metal composition. The most famous transitional is a 1943 copper cent struck on a 1942 copper blank. 1943 cents were struck in steel because of the copper shortage during World War II. Other famous transitionals include 1965 coinage struck in silver instead of clad.

There are also transitionals struck on blanks for the next year. An example is 1964 coinage in clad instead of silver. Most recently, transitionals were discovered involving the SBA and Sacagawea Dollars of 1999 and 2000. There are eight known 1999 SBA Dollars struck on the brass planchet for the 2000 Sacagawea Dollar, and four known 2000 Sacagawea Dollars struck on a clad planchet for the 1999 SBA Dollar.

Denomination	Off-Metal Planchet	Circulated	AU	Unc	Choice Unc – Gem

U.S. Gold Errors

Major mint errors on U.S. Gold coins are the most prized category of all mint errors. Gold errors are very rare and a few have traded in the \$75,000 to \$100,000 range. Even a broadstruck U.S. Gold coin can easily sell for \$15,000 to \$30,000 compared to a broadstruck Cent, Nickel, Dime or Quarter which all sell for well under \$10. Many serious collectors of Gold Errors have to wait patiently for months and sometimes even years to acquire that one special piece for their collection.

The prices listed here are for common dates in AU-Unc. Better dates and errors that are in gem condition are worth considerably more.

Denomination	Partial Collar	Broadstruck	Clipped Planchet	3% - 5% Off-Center	10% - 15% Off-Center

Mint Error News Price Guide

Indents

An indent error occurs when two blanks are fed inadvertently into the same collar, with one blank partly overlaying on top of the other. When the hammer die strikes this combination, the upper blank will be forced into the lower blank, creating a depression which is shaped similar to the upper blank. A scarce type of indent occurs when a blank intended for one denomination lands on top of a blank from a different denomination.

Die Caps

Die caps are caused when a struck coin sticks to the upper hammer die. Once the coin is struck to the die face, the reverse of the struck coin becomes the new die face. When the next blank is fed into the collar and the strike occurs, the reverse design of the adhered struck coin impresses itself into the new blank. This struck coin is a brockage strike. The coin that adhered to the upper die is known as a die cap. This process repeats itself as more coins are struck by the cap. The greater the number of strikes, the higher the cap metal will be pushed around the upper die shaft. Eventually, the cap brakes away from the die in the shape of a thimble.

Die Adjustment Strikes

Die adjustment strikes are also known as die trials. This error occurs when a coin is struck from the press with very little pressure. When the press is being set up and adjusted, extremely weak strikes occur as the strike pressure reaches its optimum level. These die trials are destroyed after being struck and are rarely found in circulation.

Double Denominations

One of the most expensive, popular, and desired types of errors are the double denominations. This error happens when a coin is struck on a previously struck coin of a smaller denomination. Examples are a cent on a struck dime, and a nickel on a struck cent. The most dramatic are those with considerable design visible from the original strike. There are a few known double denominations with different dates.

Brockages

A brockage error can only occur when there are two coins involved. One of the coins involved will always be a struck coin which has not ejected properly. That struck coin will find its way back between the dies and will be struck next to a blank planchet which was fed into the collar. The image of that first struck coin will be impressed into that side of the blank planchet. The result will be a second coin which has images of the first coin impressed into it. Those images will be pressed into the coin and the image will be in reverse. This incuse sunken image is known as a brockage.

Mint Error News Price Guide

Double & Multiple Strikes

When a blank planchet is struck by the dies, the normal procedure is for the feeders to eject the struck coin out of the collar and into a chute. If there is a malfunction and the struck coin isn't ejected, it may receive a second or third strike by the dies. A multiple struck coin can happen in many ways and have many combinations of errors.

(Since each double and multiple strike can vary from being 10% off-center to 90% off-center, the prices listed below can be substantially more based on the percent off-center and dramatic overall look.)

Off-Center Strikes

Off-center coins are one of the most common and best known types of errors. This happens when a blank which is supposed to be fed into the press, lands in the collar improperly. When this occurs only part of the blank is between the upper and lower dies. When the dies strike the blank, only that part will be struck with a design.

Off-Metals

Off-metal and wrong planchet errors occur when a correctly made blank from one denomination is accidentally fed into a press for another denomination. Examples are a nickel struck on a cent planchet and a cent struck on a dime planchet. The coin struck on an incorrect blank will weigh exactly what the denomination of that blank would have been. An even more dramatic wrong planchet error is a coin struck on a previously struck coin of a different metal.

Denomination	Off-Metal Planchet	Circulated	AU	Unc	Choice Unc – Gem

Counterbrockages

A counterbrockage error involves a cap die and a previously struck coin. When a cap die strikes a previously struck coin, the obverse design from that struck coin will be impressed into the cap. The result will be a design where the cap face will be an incuse brockage. When a new blank is struck by this cap die with an incuse brockage image, the obverse will have a raised and spread image from that incuse design of the cap. This brockage impression is known as a counterbrockage.

Fold-Over Strikes

A fold-over coin is one of the most dramatic types of errors. It occurs when the blank is standing vertically between the dies. During the strike, the force is so great that it bends and folds the blank. These fold-overs can be on-center or off-center, and come in many different shapes. There are a few fold-overs with multiple errors, either with an additional strike or fold-over. Denominations above quarters are very scarce.

Denomination	AU	AU Dated	Unc	Unc Dated

Martha Washington Test Pieces

There is one set of a Dime, Quarter and Half struck by Martha Washington dies that are permanently housed in the Smithsonian Institute, embedded in blocks of lucite. According to United States Pattern and Related Issues, by Andrew W. Pollock III, “the only trial pieces purported to have survived metallurgical testing in 1965 were the Dime, Quarter Dollar, and Half Dollar equivalent strikes in copper-nickel clad over copper.”

Mike Byers’ discovery of the Martha Washington Test Piece on a copper-zinc Cent planchet struck 10% off-center with a uniface reverse was a front page Coin World article on August 7th, 2000.

Denomination	Unc	Choice	Gem
Martha Cent	\$4,000	\$5,000	\$6,000
Martha Nickel	\$4,500	\$6,000	\$7,500

Missing Edge Lettering

A mint error has recently been discovered on the new Presidential Dollars. These coins inadvertently left the United States Mint without edge-lettering on them. The inscriptions 'In God We Trust,' 'E Pluribus Unum,' as well as the mint mark and year are absent from these errors.

(Prices as of September 20, 2008 and are for certified pieces by PCGS and NGC)

COINLINK™

Your Source for Daily Numismatic News and Resources on the Web

Search:

CoinLink operates on one simple principle...

To provide the numismatic community with access to the “best” numismatic information, news and resources on-line.

CoinLink® was started in 1995 by Anteater Design Group Inc., and is headquartered in Longwood, Florida (just northeast of Orlando).

For over 12 years we have been proud to operate the most popular and comprehensive numismatic directory on the web, referring collectors to thousands of numismatic sites, and providing unbiased access to resources that are informative and relevant to collectors and dealers alike.

The reason for our success has been a willingness to listen to our users suggestions and provide innovative solutions to aggregating the diverse and ever changing sources of numismatic information available.

CoinLink does not buy or sell coins. We have NO commercial or financial interest in any company that does. We do NOT compete against our advertisers.

Rather, our goal is to provide a platform from which dealers and collectors can find each other and stay informed about what is happening within the marketplace and within the hobby.

As we move into our 12th year of operations, we want to thank all of the users, supporters and sponsors who have made CoinLink what it is today, and who continue to shape the direction in which CoinLink will grow in the future.

Scott Purvis - President
Anteater Design Group Inc.

Multiple error: No date double struck nickel, struck on a clad dime planchet. Unc with obverse & reverse damage. Both strikes off center & die struck.

\$1,200

AL'S COINS FEATURED INVENTORY

1943 off metal - 1c struck on a dime planchet. Weighs 2.43 grams. Weakly struck, but all numerals are clear. Horizontal obverse lamination across bottom. Coin looks cleaned at one time.

\$1,495

1998 U.S. Silver Eagle Struck on an Elliptical Planchet NGC MS 68. Elliptical planchets are among the rarest type of mint error. The larger the denomination, the fewer are known. The fact that this U.S. Silver Eagle exists that was struck on an elliptical planchet is unbelievable. Instead of weighing 31.10 grams, it weighs 26.59 grams. A spectacular error.

\$3,500

AL'S COINS FEATURED INVENTORY

(S) Mercury Dime Die Adjustment Strike NGC

\$950

1990-S Proof Lincoln Cent double struck NGC PF 67 Red. This San Francisco Mint Proof Lincoln Cent was double struck in the collar on the obverse. Most U.S. Proof errors that are known were struck in the late 60's and early 70's and were sold in a large estate a few years ago. This proof error is very unusual since the first strike was off-center at 3:00 and the second strike was centered, obliterating most of the original strike. Rare.

\$1,850

AL'S COINS FEATURED INVENTORY

1787 Fugio Cent Triple Struck SEGS VF 20

\$3,995

1964 Silver Kennedy Half uniface obverse double struck 95% off-center PCGS MS 63. This is a very unusual multiple error on a 1964 Silver Kennedy Half. The obverse was struck through a cap die on the first strike. The second strike was off-center and die struck both sides. This came out of an estate along with a few other dramatic Silver Kennedy Half Errors.

\$2,750

AL'S COINS FEATURED INVENTORY

2000-P Sacagawea Dollar triple struck with indent ANACS MS 63. This multiple error Sacagawea Dollar is very dramatic and unusual. It was struck three times and also has an indent on the reverse. It is part of a mated pair and a coin is out there somewhere that would mate to this Sacagawea Dollar.

\$1,750

2000-P Sacagawea Dollar struck three times on double clipped planchet ANACS MS 60. This Sacagawea Dollar was struck three times on a planchet that has two clips. It is a rare multiple error and is very dramatic. There is a scratch on the reverse which ANACS noted on the holder.

\$850

AL'S COINS FEATURED INVENTORY

1875-CC Liberty Seated Dime struck off-center ANACS F 12. All major errors on Carson City coins are rare. This Liberty Seated Dime was struck 15% off-center.

\$1,495

Lincoln Cent multi struck off-center on Dime planchet NGC MS 64. This Lincoln Cent was struck many times off-center on a clad Dime planchet. Part of the head is visible on the obverse but the reverse is uniface. It is an unusual combination of many different errors on one coin.

\$595

AL'S COINS FEATURED INVENTORY

Feeder finger used to produce Two Rupees coins. This piece came loose and was die struck. Part of the "2006" date shows on one side.

\$2,500.00

Coin Auctions Help

U.S. Coin Information - Guides - News - Forum

Coinauctionshelp.com is not a coin auctions website, but help for United States coin collectors who do buy coins at online auctions, but we are still much more than that. Besides being the fastest growing coin site on the web, we offer coin guides, facts, news, pictures, price guides, third party grading information, coin site links, and targeted ebay coin auctions for every major U.S. Coin series minted. If you can't find the coin or information you need, send us an email and we will send it to you and add it to our site. Let us do the research for you!

Targeted Coin Links:

First, let's talk about our targeted ebay coin auctions. Simply put, we do the ebay coin auction search for you. We spent months building links at ebay for every U.S. Coin series, and often for each date in the series. We did our best to eliminate irrelevant coin auctions so the user can click a link and go directly to only the coin type or date they wish to buy.

Although, our searches are not perfect because some coins are so rare that they are not listed on ebay often, and there are many sellers on ebay that use keyword spamming in their ebay auctions. However, most of our searches have eliminated this problem, so you don't have to spend hours trying to find the exact coin you need for your collection.

Plus, the sales generated from these links allow us to continue providing all the free information on this website.

If a certain date is not listed on ebay after you click a link, it means one is not listed at the present, but might be in the near future. So always check back often so you don't miss out on an opportunity for that rare and valuable coin!

Facts And Pictures:

We offer a page for every U.S. Coin series. A list of the page links can be found by clicking the Coin Facts tab on the navigation bar. Our coin facts pages offer the collector large pictures with important features pointed out so the mint mark, designer initials, denomination, and other design elements to allow for proper identification of coin type and varieties of that coin series. Also, each page contains important facts about the coin type, a list of rare and valuable dates for "cherry pickers", a price guide and the targetable links we mentioned earlier.

We add new information to these pages often, and at site visitors request. So check back to see what's new or ask to be added to our email list and receive email updates and contained in our Newsletter.

Coin News And Guides:

Although, we offer the latest U.S. coin news on our homepage, we don't limit the reporting to just what everyone else reports, but we find news that other site ignore or don't know about yet. Often, we will have a news articles posted on our site before the latest issue of Coin World comes out!

We offer news for latest auction sales, mint error discoveries, third party grading services, and offer guides on featured coin types, mint errors, fake coins, cleaning and identifying cleaned coins, grading coins, and many more guides to help the collector be better informed. Basically we report on the major sales and finds, and on the obscure news which allows us to offer our readers news and guides they can't find anywhere else.

In conclusion, this is about us in the brief, but in no way describes what we do completely as we our always updating and adding to coinauctionshelp.com to make the coin collector's hobby more informative, exciting and safe. We gladly answer questions and take suggestions because only you, the visitor, know what makes a good coin site, a great coin site.

ERROR WORLD

Join the *hottest*
Error Coin Club on the Net!

e r r o r w o r l d c l u b . o r g

The Error World on-line coin club exists for the purpose of advancing the knowledge and the field of error coin collecting.

Error World is dedicated to the promotion, discussion and dissemination of facts and ideas about error coinage, both domestic and world-wide.

Error World exists as a vehicle to bring collectors of both foreign and domestic error coinage together in a professional and relaxed atmosphere where they can exchange information, display photos and engage in lively debate about error coinage.

Error World is a non-profit organization with all revenues being put back into the club to provide improved services to the members of the club.

Error World will, from time to time, accept contributions from designated Patrons in the form of contest prizes, and/or cash to be used to defray club expenses.

Error World will, from time to time, attempt to obtain sponsors from the numismatic field who will bring price saving offers to Error World members.

Fred Weinberg & Co.

Dealer in Major Mint Error Coins & Currency

fredweinberg.com

BUYING MAJOR ERROR COINS & CURRENCY

If you have a single major mint error coin, either a recent issue or an older type coin, or 1,000 Off-Center Cents, please contact us. We stock over 60,000 Major Mint Error Coins and constantly need to purchase Major Error Coins for our clientele (please note that we do not deal in or buy Die Varieties, Damaged Coins, Doubled Dies, Filled Dies, or Die Cracks).

We do buy Major Mint Errors - such as Off-Center, Off-Metals, Double Strikes, Clad Layers missing, Die Caps, Double Denomination, etc.

Because of the many differences in each Error Coin we request that you send scans of your coin(s) to us for our examination and firm offer.
